It takes 70%-100% exposure in Higher upside potential with catalyst expected to play out over a period of 2-3 years & 0-30% in Consistent performers.	The Strategy aims to follow a value investment style and intends to offer a diversified portfolio of stocks that have high potential but are quoting at a discount to their fair/intrinsic value. The core investment philosophy of investing is based on : 1. Stocks cannot continue to quote at values that are below their fair values over the long term; 2. At some point in time, the markets are likely to recognize the extent of under-valuation of these companies. The same could lead to a rerating/appreciation in the company's stock price.	The PMS is a multi-cap PMS designed to generate alpha and risk-adjusted returns for clients by investing in benchmark agnostic portfolio across market capitalization. The idea is to focus on growth in value. A well diversified, aspiring leaders portfolio that makes selective sector calls with a contrarian approach and usually are first investors.
